

EXPERIENCE

Senior iOS Developer

Philippine National Bank

June 2024 - Present  
Pasay, PH

- Assumed ownership of key iOS projects following the departure of the senior iOS developer who architected the application's early stages, taking over core projects and serving as the primary technical point of contact for business stakeholders and management.
- Led the design, engineering, and implementation of major iOS initiatives, including Apple Pay, credit card lock/unlock, Mobile Account Opening, and QR-based account/device transfer, while proactively addressing overlooked issues and technical debt to improve overall application quality and reliability.
- Drove technical design and architectural decisions for major iOS features and changes, evaluating cross-feature dependencies and potential impacts to minimize regressions and maintain stability across the enterprise banking application.
- Led a department-wide AI knowledge-sharing session for 42 software developers, cloud engineers, and other technology professionals, demonstrating practical applications of GitHub Copilot and AI-assisted development workflows to improve developer productivity and streamline software engineering processes.

Full Stack Developer

Achieve Without Borders Inc.

May 2023 - May 2024  
Makati, PH

- Led the redesign and execution of a large-scale migration of 1.5M + records, replacing synchronous processing with scheduled asynchronous background workers and reducing the estimated migration timeline from approximately six months to one month.
- Took ownership of multiple ERP systems, handling development and client-facing technical discussions while assuming additional responsibilities during a senior developer's extended leave.
- Developed key features across ERP and mobile platforms using Python, Odoo, and Flutter, including SOA generation, an e-commerce voucher system, and a redesigned mobile dashboard.
- Led iOS-side delivery for the Flutter application, owning platform-specific issue resolution, feature implementation, bug fixes, and build distribution while collaborating across mobile and ERP teams.

Software Developer

Taters Enterprises Inc.

Feb 2022 - May 2023  
Makati, PH

- Led a 5–6 month modernization of a production e-commerce platform and admin portal, re-architecting a tightly coupled CodeIgniter/JavaScript application into a ReactJS single-page application with Redux and REST APIs while maintaining continuity for existing customers.
- Designed and delivered major customer-facing e-commerce capabilities, including an online Catering System and PopClub promotional platform with vouchers, timed deals, and flash promotions, alongside core checkout, payment, inventory, authentication, and delivery workflows.
- Introduced a more maintainable frontend architecture and testing practices, using reusable React components, Redux state management, REST APIs, and unit testing to support the platform's redesigned user experience and long-term development.
- Provided technical leadership and mentorship to 7 developers, onboarding senior and junior engineers and interns across architecture, codebase, development environment, Git workflows, coding standards, task assignment, and code reviews, while advising management and the CEO on technical feasibility and implementation decisions.

Software Developer Intern

RightValley Inc.

Feb 2021 - June 2021  
Makati, PH

- Built a Django-based microsite platform from the ground up with minimal senior developer supervision, enabling the creation and management of multiple sub-sites within a centralized web application.
- Contributed to a Flutter-based e-commerce application, implementing minor features, resolving bugs, and gaining hands-on experience with production mobile development.
- Worked across web and mobile development using Django, Python, and Flutter, collaborating with senior developers throughout implementation, testing, and issue resolution.

EDUCATION

Technological University of the Philippines

BS in Computer Science ( GPA - 1.616 )

June 2018 - July 2022  
Manila, PH

- Organization / Awards: Cumlaude, Vice President of Grayhawks Robotics, Webinar Speaker for Mobile Development.
